

# 3000 Series Indicators Instruction Manual

**T31P Indicator** 

**T31XW Indicator** 

Compliance to the following standards is indicated by the corresponding marking on the product.

| Marking Standard   |                            |
|--|----------------------------|
| This product conforms to the EMC Directive 89/336/EEC, the Low Voltage Directive 73 and the Non-automatic Weighing Instruments Directive 90/384/EEC. The complete De Conformity is available from Ohaus Corporation. |                            |
| C  | AS/NZS4251.1, AS/NZS4252.1 |

#### Important Notice for verified weighing instruments

Weighing Instruments verified at the place of manufacture bear one of the preceding marks on the packing label and the green 'M' (metrology) sticker on the descriptive plate. They may be put into service immediately.

Weighing Instruments to be verified in two stages have no green 'M' (metrology) on the descriptive plate and bear one of the preceding identification mark on the packing label. The second stage of the initial verification must be carried out by the approved service organization of the authorized representative within the EC or by the national weights & measures (W+M) authorities.

The first stage of the initial verification has been carried out at the manufacturer's work. It comprises all tests according to the adopted European standard EN 45501:1992, paragraph 8.2.2.

If national regulations limit the validity period of the verification, the user of the weighing instrument must strictly observe the re-verification period and inform the respective W+M authorities.

#### Disposal

In conformance with the European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE) this device may not be disposed of in domestic waste. This also applies to countries outside the EU, per their specific requirements.

Please dispose of this product in accordance with local regulations at the collecting point specified for electrical and electronic equipment.

If you have any questions, please contact the responsible authority or the distributor from which you purchased this device.

Should this device be passed on to other parties (for private or professional use), the content of this regulation must also be related.

Thank you for your contribution to environmental protection.

#### **FCC Note**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

#### **Industry Canada Note**

This Class A digital apparatus complies with the Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la Norme NMB-003 du Canada.

#### ISO 9001 Registration

In 1994, Ohaus Corporation, USA, was awarded a certificate of registration to ISO 9001 by Bureau Veritus Quality International (BVQI), confirming that the Ohaus quality management system is compliant with the ISO 9001 standard's requirements. On May 15, 2003, Ohaus Corporation, USA, was re-registered to the ISO 9001:2000 standard.

EN-4 3000 Series Indicators

#### 1. INTRODUCTION

This manual contains installation, operation and maintenance instructions for the T31P and T31XW Indicators. Please read this manual completely before installation and operation.

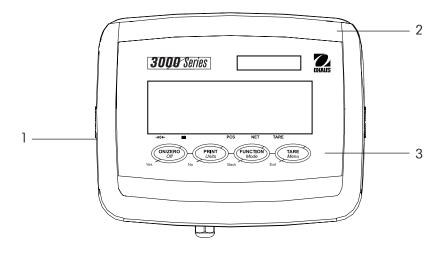

#### 1.1 Safety Precautions

For safe and dependable operation of this equipment, please comply with the following safety precautions:

- Verify that the input voltage range printed on the data label matches the local AC power to be used.
- Make sure that the power cord does not pose a potential obstacle or tripping hazard.
- Use only approved accessories and peripherals.
- Operate the equipment only under ambient conditions specified in these instructions.
- Disconnect the equipment from the power supply before cleaning.
- Do not operate the equipment in hazardous or unstable environments.
- Do not immerse the equipment in water or other liquids.
- Service should only be performed by authorized personnel.
- The T31XW is supplied with a grounded power cable. Use only with a compatible grounded power outlet.

EN-10 3000 Series Indicators

#### 2. INSTALLATION

#### 2.1 Unpacking

Unpack the following items:

- T31P or T31XW Indicator
- AC Adapter (T31P only)
- Mounting Bracket (supplied with T31XW only)
- Knobs (2) (supplied with T31XW only)
- Capacity Label Sheet
- Instruction Manual CD
- Warranty Card
- LFT sealing Kit

#### 2.2 External Connections

#### 2.2.1 RS232 interface Cable to T31P

Connect the optional RS232 cable to the RS232 connector Figure 1-1, item 13).

| Pin | Connection |
|-----|------------|
| 1   | N/C        |
| 2   | TXD        |
| 3   | RXD        |
| 4   | N/C        |
| 5   | GND        |
| 6   | N/C        |
| 7   | N/C        |
| 8   | N/C        |
| 9   | N/C        |

Figure 2-1. RS232 Pins.

#### 2.2.2 AC Power to T31P

Connect the AC Adapter to the power receptacle (Figure 1-1, item 8), then plug the AC Adapter into an electrical outlet.

#### 2.2.3 AC Power to T31XW

Connect the AC plug to a properly grounded electrical outlet.

#### 2.2.4 Battery Power

The indicator can be operated on the internal rechargeable battery when AC power is not available. The indicator will automatically switch to battery operation if there is a power failure or the power cord is removed.

#### Note:

Before using the indicator for the first time, the internal rechargeable battery should be fully charged for up to 12 hours. The indicator can be operated during the charging process. The battery is protected against over charging and the indicator can remain connected to the AC power line.

Connect AC power to the indicator and allow it to charge. While the battery is charging, the triangle above the battery function symbol will light. When the battery is fully charged, this triangle will disappear.

The indicator can operate for up to 100 hours on a fully charged battery.

During battery operation, a flashing triangle above the battery function symbol indicates the battery is low and requires recharging. Approximately 60 minutes of operation will remain when the battery symbol starts to blink. The indicator will display Lo.BAT and automatically turn off when the battery is fully discharged.

# **CAUTION**

BATTERY IS TO BE REPLACED ONLY BY AN AUTHORIZED OHAUS SERVICE DEALER.

RISK OF EXPLOSION CAN OCCUR IF REPLACED WITH THE WRONG TYPE OR CONNECTED IMPROPERLY.

Dispose of the lead acid battery according to local laws and regulations.

#### 2.2.5 Mounting Bracket to T31XW

Align the mounting bracket over the threaded holes in the side of the indicator and install the knobs. Adjust the indicator to the desired angle and tighten the knobs.

#### 2.3 Internal Connections

Some connections require the housing to be opened.

#### 2.3.1 Opening the Housing

CAUTION: ELECTRICAL SHOCK HAZARD. REMOVE ALL POWER CONNECTIONS TO THE INDICATOR BEFORE SERVICING OR MAKING INTERNAL CONNECTIONS. THE HOUSING SHOULD ONLY BE OPENED BY AUTHORIZED AND QUALIFIED PERSONNEL, SUCH AS AN ELECTRICAL TECHNICIAN.

EN-12 3000 Series Indicators

#### **T31P**

Remove the four Phillips head screws from the rear housing.

Open the housing being careful not to disturb the internal connections.

Once all connections are made, reattach the front housing.

#### **T31XW**

Remove the four hex head screws from the rear housing.

Open the housing by carefully pulling the top of the front housing forward.

Once all connections are made, reattach the front housing.

The screws should be tightened fully to maintain a watertight seal.

#### 2.3.2 Scale Base to T31P or T31XW

Pass the load cell cable through the strain relief (Figure 1-1, item 9 or Figure 1-2, item 10) and attach it to terminal block J5 (Figure 1-3, item 5).

Re-tighten the strain relief to ensure a watertight seal.

#### **Jumper Connections**

For a 4-wire load cell with no sense wires: Jumpers W2 and W3 must be shorted.

For a 6-wire load cell that includes sense wires, see Figure 2-2. Jumpers W2 and W3 must be opened.

For load cells with an extra ground shield wire: Connect the shield to the center position (GND) of J5.

| Pin  | Connection  |
|------|-------------|
| J5-1 | +EXCITATION |
| J5-2 | +SENSE      |
| J5-3 | +SIGNAL     |
| J5-4 | GND         |
| J5-5 | -SIGNAL     |
| J5-6 | -SENSE      |
| J5-7 | -EXCITATION |

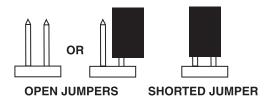

Figure 2-2. Jumper Connections.

After wiring is completed and jumpers are in place, replace the indicator housing screws. Make sure the strain relief is properly tightened.

#### 2.3.3 RS232 Interface Cable to T31XW

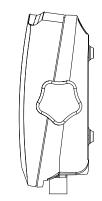

Pass the optional RS232 cable through the strain relief (Figure 1-2, item 9) and attach it to terminal block J7 (Figure 1-3, item 7). Re-tighten the strain relief to ensure a water tight seal.

| Pin  | Connection |
|------|------------|
| J7-1 | RXD        |
| J7-2 | TXD        |
| J7-3 | GND        |

#### 2.4 T31P Rear Cover Orientation

The T31P is delivered in the wall mount orientation with the connections exiting below the display. The rear housing may be reversed so the connections exit above the display when the T31P is placed horizontally on a bench. See Figure 2-4. To reverse the rear housing, remove the four Phillips head screws, carefully rotate the housing 180°, and reinstall the screws.

**CAUTION**: Take care not to pinch any internal cables attached inside.

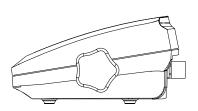

Figure 2-4. Bench Top Configuration.

#### 2.5 Direct Wall Mounting (T31P only)

The T31P indicator may be mounted directly to a wall using two screws (not included). Select appropriate size screws that fit into the holes at the bottom of the indicator housing. See Figure 2-5. When mounting to a wall without a solid backing, use appropriate anchoring hardware.

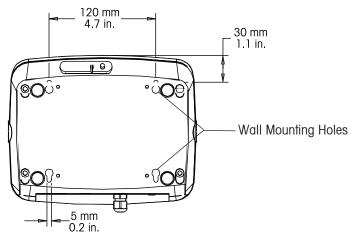

Figure 2-5. T31P Direct Wall Mounting.

#### 2.6 Mounting Bracket (T31XW only)

Attach the bracket to a wall or table using fasteners (not supplied) that are appropriate for the type of mounting surface. The bracket will accommodate up to 6 mm (1/4") diameter screws. Locate the mounting holes as shown in Figure 2-6.

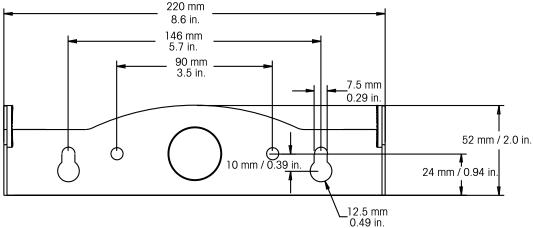

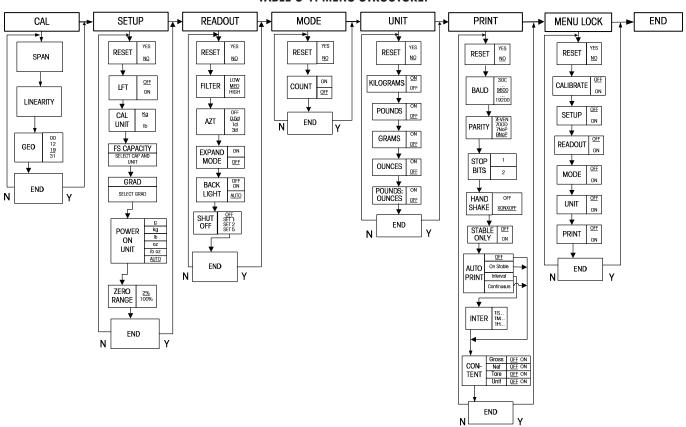

Figure 2-6. Mounting Bracket Dimensions.

#### 3 SETTINGS

#### 3.1 Menu Structure

**TABLE 3-1. MENU STRUCTURE.** 

#### 3.2 Menu Navigation

#### TO ENTER THE MENU MODE

Press and hold the Menu button until MENU appears on the display. The first upper level menu appears on the display. Summary of button navigation functions in menu mode:

- --Yes Allows entry into the displayed menu.
  - Accepts the displayed setting and advances to the next menu item.
- --No Skips by the displayed menu.
  - Rejects the displayed setting or menu item and advances to the next available item.
- --Back Moves backwards through the upper and middle level menus.
  - Backs out of a list of selectable items to the previous middle level menu.
- --Exit Exits from menu directly to the active weighing mode.

#### 3.3 Calibration Menu

Two calibration processes are available: Span Calibration and Linearity Calibration.

#### NOTES:

- 1. Make sure that appropriate calibration masses are available before beginning calibration.
- 2. Make sure that the scale base is level and stable during the entire calibration process.
- 3. Calibration is unavailable with LFT set to On.
- 4. Allow the Indicator to warm up for approximately 5 minutes after stabilizing to room temperature.
- 5. To abort calibration, press the **Exit** button anytime during the calibration process.

EN-16 3000 Series Indicators

#### 3.3.1 Span Calibration

Span Calibration uses two points to adjust the scale. The first point is the zero value where there is no weight on the scale. The second point is the Span value where a calibration mass is placed on the scale.

SPAN

When SPAN is displayed, press the Yes button to access the Span Calibration menu item.

The display flashes 0.

∏ kg

With no weight on the scale, press the Yes button to establish the zero point.

The display shows --C-- while the zero point is established.

--[--

The display flashes the span calibration point. Place the specified weight on the scale and press the **Yes** button.

3[] kg

To choose a different span point, repeatedly press the **No** button to increment the selections or press the **Back** button to decrement the selections. Refer to Table 3-3 for available span points. When the desired value is displayed, place the specified weight on the scale and press the **Yes** button.

25 kg

The display shows --C-- while the span point is established.

--[--

If span calibration was successful, the scale exits to the active weighing mode and displays the actual weight value.

25.000 kg

#### 3.3.2 linearity Calibration

Linearity calibration uses 3 calibration points. The first calibration point is established with no weight on the scale. The second calibration point is established at approximately half capacity. The third calibration point is established at capacity. The Linearity calibration points are fixed and cannot be altered by the user during the calibration procedure. Refer to Table 3-3 for the linearity points.

L INEAr

When LINEAr is displayed, press the Yes button to access the Linearity Calibration menu item.

The display flashes 0. With no weight on the scale, press the Yes button to establish the zero point.

kg

The display shows --C-- while the zero point is established.

--[--

The display flashes the mid calibration point.

The display flashes the full calibration point.

Place the specified weight on the scale and press the **Yes** button.

15 kg

The display shows --C-- while the mid point is established.

--[--

Place the specified weight on the scale and press the **Yes** button.

] [] kg

The display shows --C-- while the full point is established.

--[--

If linearity calibration was successful, the scale exits to the active weighing mode and displays the actual weight value.

30.000 kg

#### 3.3.3 Geographical Adjustment Factor

The Geographcial Adjustment Factor (GEO) is used to compensate for variations in gravity.

680

**Note:** Changing the GEO Factor alters the calibration. The GEO value was set at the factory and should only be changed by an authorized manufacturer's representative or certified verirication personnel.

Refer to table 3-2 to determine the GEO factor that corresponds to your location.

#### 3.3.4 End Calibration

Advance to the next menu.

End

#### 3.4 Setup Menu

SELUP

When the Indicator is used for the first time, enter this menu to set the Capacity and Graduation.

| Reset           | No, Yes         |
|-----------------|-----------------|
| Legal for Trade | <b>Off</b> , On |
| Cal Unit        | kg, lb          |
| Capacity        | <b>5</b> 20000  |
| Graduation      | <b>0.001</b> 20 |

Power On Unit g, kg, lb, oz, lb:oz, Auto

Zero Range **2%**, 100% End Setup Exit SETUP menu

#### 3.4.1 Reset

r E S E Ł

Reset the Setup menu to the factory defaults. No = not reset.

no

Yes = reset.

YE 5

**NOTE**: If the Legal for Trade menu item is set to ON, the Capacity, Graduation, Zero Range and Legal For Trade settings are not reset.

#### 3.4.2 Legal for Trade

Set the legal for trade status.

ON

 $\mathsf{OFF} = \mathsf{off}$ 

= on

LFE

OFF

80

#### 3.4.3 Calibration Unit

Set the unit during calibration.

CAL UN kg  $\,=$  Calibrate using kg weights

CAL UN Ib = Calibrate using pound weights

[RLUN

#### 3.4.4 Capacity

Set the scale capacity from 5 to 20000. Refer to the Setup Table 3.3 for available settings.

ERP

EN-20 3000 Series Indicators

**TABLE 3-3. SETUP AND CALIBRATION VALUES** 

| Capacity | Graduation size with LFT OFF | Graduation size with LFT ON | Span calibration points   | Linearity calibration points |  |
|----------|------------------------------|-----------------------------|---|------------------------------|--|

#### 3.10 Security Switch

A security switch is located on the Main PCB board. When the switch is set to the on position, user menu settings that were locked in the Menu Lock can not be changed.

Open the housing as explained in Section 2.3.1. Set the position of security switch to ON as shown in Figure 1-3.

#### 4 OPERATION

#### 4.1 Turning Indicator On/Off

To turn the Indicator on, press the and hold the **ON/ZERO** *Off* button for 2 seconds. The Indicator performs a display test, momentarily displays the software version, and then enters the active weighing mode.

To turn the Indicator off, press and hold the **ON/ZERO** *Off* button until OFF is displayed.

#### 4.2 Zero Operation

Zero can be set under the following conditions:

- Automatically at Power On (initial zero).
- Semi-automatically (manually) by pressing the **ON/ZERO** Off button.
- Semi-automatically by sending the Zero command (Z or alternate zero command).

Press the **ON/ZERO** *Off* button to zero the weight display. The scale must be stable to accept zero operation.

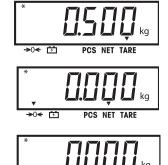

#### 4.3 Manual Tare

When weighing an item that must be held in a container, taring stores the container weight in memory. Place the empty container on the scale (example 0.5 kg) and press the **TARE** button. The display will show the net weight.

To clear the Tare value, empty the scale and press the **TARE** button. The display will show the gross weight.

>0< 😚

#### 4.4 Changing Units of Measure

Press and hold the **PRINT** *Units* button until the desired measuring unit appears. Only measuring units enabled in the Unit Menu will be displayed (refer to Section 3.7).

#### 4.5 Printing Data

Printing the displayed data to a printer or sending the data to a computer requires that the communication parameters in the Print Menu are set (refer to Section 3.8).

Press the **PRINT** *Units* button to send the displayed data to the communication port (the Auto-Print Mode in Section 3.8 function must be Off).

#### 4.6 Application Modes

Only modes enabled in the mode menu will be displayed (refer to Section 3-6).

#### 4.6.1 Weighing

Place the item to be weighed on the scale. The illustration indicates a sample of 1.5 kg, Gross weight.

**Note:** To return to the Weighing mode from the Parts Counting mode, press and hold the *Mode* button until WEIGH is displayed.

#### 4.6.2 Parts Counting

Use this mode to count parts of uniform weight. The Indicator determines the quantity based on the average weight of a single part. All parts must be uniform in weight for accurate measurements.

To enter the Parts Counting mode, press and hold the *Mode* button until Count is displayed.

#### Average Piece Weight (APW)

When the *Mode* button is released, CLr.PW Pcs is displayed.

**NOTE**: If no APW has been previously stored, the CLr.PW display is skipped and the display shows PUt10Pcs.

#### Clearing a Stored APW

Press the **Yes** button to clear the stored APW.

EN-30 3000 Series Indicators

#### **Recalling a Stored APW**

Press the **No** button to recall the existing APW.

Press the **FUNCTION** *Mode* button to temporarily display the APW value.

#### Establishing the Average Piece Weight (APW)

The display shows Put10 Pcs.

#### Establishing a New APW

Press the No button to increment the sample size. Choices are 5, 10, 20, 50, 100 and 200.

To establish the APW, place the specified quantity of samples on the scale and press the **Yes** button to capture the weight.

#### **Begin Counting**

Place the parts on the scale and read the count. If a container is used, be sure to tare the empty container first.

#### 5 SERIAL COMMUNICATION

The T31P and T31XW Indicators include an RS232 serial communication interface.

The setup of RS232 operating parameters are more fully explained in Section 3.8. The physical hardware connection is explained in in Section 2.2.

The interface enables display data to be sent to a computer or printer. A computer can be used to control some functions of the indicator using the commands listed in Table 5-1.

#### 5.1 Interface Commands

Communicate to the indicator using the command characters listed in Table 5-1.

TABLE 5-1. SERIAL INTERFACE COMMAND TABLE.

| Command<br>Character | Function   |  |  |  |  |

#### 6.1 Settings

Close the housing.

Enter the menu to verify the settings and perform a calibration as explained in Section 3. Set the LFT menu to ON. Exit the Setup menu and power off the indicator.

Open the housing as explained in Section 2.3.1. Set the position of the security switch to ON as shown in Figure 1-3, (item 9).

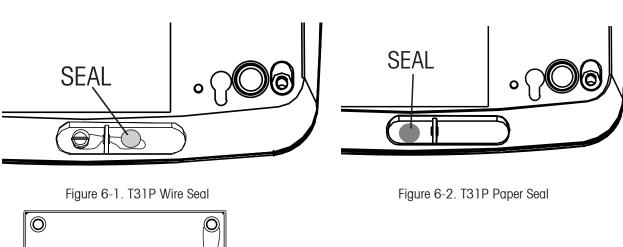

**NOTE**: When LFT is set to ON and the security switch is set to ON, the following menu settings cannot be changed: Span Calibration, Linearity Calibration, Calibration Unit, GEO, LFT, Capacity, Graduation, Zero Range, Stable Range, AZT, Modes, Units. To enable editing of these menu settings, return the security switch to the off position and set LFT menu item to off.

#### 6.2 Verification

Before this product can be used in a trade approved application, it must be inspected in accordance with local weights and measures regulations. It is the responsibility of the purchaser to ensure that all pertinent legal requirements are met. Please contact your local weights and measures office for further details.

#### 6.3 Sealing

The weights and measures official can apply a wire or paper security seal as shown below.

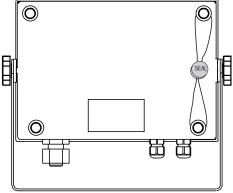

Figure 6-3. T31XW Wire Seal

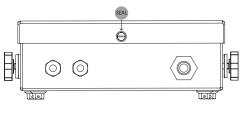

Figure 6-4. T31XW Paper Seal

# 7 MAINTENANCE

#### CAUTION: DISCONNECT THE UNIT FROM THE POWER SUPPLY BEFORE CLEANING.

# 7.1 Model T31P Cleaning

- The housing may be cleaned with a cloth dampened with a mild detergent if necessary.
- Do not use solvents, chemicals, alcohol, ammonia or abrasives to clean the housing or control panel.

# 7.2 Model T31XW Cleaning

- Use approved cleaning solutions for the stainless-steel Indicator housing and rinse with water. Dry thoroughly.
- Do not use solvents, chemicals, alcohol, ammonia or abrasives to clean the control panel.

# 7.3 Troubleshooting

**TABLE 7-1. TROUBLESHOOTING.** 

| SYMPTOM   | PROBABLE CAUSE(s)                                       | REMEDY  |  |
|---|---|---|--|
| Unit will not turn on.                                  | Power cord not plugged in or properly connected.        | Check power cord connections. Make sure power cord is plugged in properly into the power outlet.                          |  |
|   | Power outlet not supplying electricity.                 | Check power source.   |  |
|   | Battery power used up.                                  | Reconnect AC power to charge the battery.   |  |
|   | Other failure.  | Service required.   |  |
| Cannot zero the Scale, or will not zero when turned on. | Load on Scale exceeds allowable limits.                 | Remove load on Scale.   |  |
| umeu on.  | Load on Scale is not stable.                            | Wait for load to become stable.   |  |
|   | Load Cell damage.                                       | Service required.   |  |
| Unable to calibrate.                                    | Lock Calibration Menu set to On.                        | Set Lock Calibration Menu to Off.   |  |
|   | Lock switch is "on".                                    | Refer to Section 3.9 Menu Lock. Set the Lock switch to Off.   |  |
|   | LFT menu set to On.                                     | Set LFT menu to Off.  |  |
|   | Incorrect value for calibration mass.                   | Use correct calibration mass.   |  |
| Cannot display weight in desired weighing unit.         | Unit not set to On.                                     | Enable unit in the Units Menu.<br>Refer to Section 3.7 in the Unit Menu.  |  |
| Cannot change menu settings.                            | Menu has been locked.                                   | Set selected menu to Off in the Lock Menu.<br>Lock Switch on the circuit board may<br>need to be set to the Off position. |  |
|   | Lock switch set on.                                     | Set the Lock switch to off.   |  |
| Battery indicator is flashing.                          | Battery discharged.                                     | Connect indicator to power and charge battery.  |  |
| Battery fails to charge fully.                          | Battery is defective.                                   | Have the battery replaced by an authorized Ohaus service dealer.  |  |
| Error 7.0   | Unstable weight reading when defining reference weight. | Unstable Error, check platform location.  |  |
| Error 8.1   | Weight reading exceeds Power On Zero limit.             | Remove load from scale. Recalibrate scale   |  |
| Error 8.2   | Weight reading below Power On Zero limit.               | Add load to scale. Recalibrate scale.   |  |
| Error 8.3   | Weight reading exceeds Overload limit.                  | Reduce load on scale.   |  |
| Error 8.4   | Weight reading below Underload limit.                   | Add load to scale. Recalibrate scale.   |  |

# 8. TECHNICAL DATA

# 8.1 Specifications

#### **Materials**

T31XW Housing: stainless steel T31P Housing: ABS plastic

Keypad: polyester Feet: Rubber

Display Window: Polycarbonate

#### **Ambient conditions**

The technical data is valid under the following ambient conditions:

Ambient temperature: -10°C to 40°C / 14°F to 104°F

Relative humidity: Maximum relative humidity 80% for temperatures up to 31°C decreasing linearly to 50%

relative humidity at 40°C.

Height above sea level: up to 4000m

Operability is assured at ambient temperatures between -10°C. and 40°C.

#### LIMITED WARRANTY

Ohaus products are warranted against defects in materials and workmanship from the date of delivery through the duration of the warranty period. During the warranty period Ohaus will repair, or, at its option, replace any component(s) that proves to be defective at No charge, provided that the product is returned, freight prepaid, to Ohaus.

This warranty does Not apply if the product has been damaged by accident or misuse, exposed to radioactive or corrosive materials, has foreign material penetrating to the inside of the product, or as a result of service or modification by other than Ohaus. In lieu of a properly returned warranty registration card, the warranty period shall begin on the date of shipment to the authorized dealer. No other express or implied warranty is given by Ohaus Corporation. Ohaus Corporation shall Not be liable for any consequential damages.

As warranty legislation differs from state to state and country to country, please contact Ohaus or your local Ohaus dealer for further details.

Printed in China

# Defender™ 3000 Series Base Instruction Manual

# **Compliance**

This product conforms to the EMC directive 89/336/EEC and the Low Voltage Directive 73/23/EEC. The complete declaration of Conformity is available from Ohaus Corporation

#### Disposal

In conformance with the European Directive 2002/96 EC on Waste Electrical and Electronic Equipment (WEEE) this device may not be disposed of in domestic waste. This also applies to countries outside the EU, per their specific requirements.

Please dispose of this product in accordance with local regulations at the collecting point specified for electrical and electronic equipment.

If you have any questions, please contact the responsible authority or the distributor from which you purchased this device.

Should this device be passed on to other parties (for private or professional use), the content of this regulation must also be related.

Thank you for your contribution to environmental protection.

#### ISO 9001 Registration

In 1994, Ohaus Corporation, USA, was awarded a certificate of registration to ISO 9001 by Bureau Veritus Quality International (BVQI), confirming that the Ohaus quality management system is compliant with the ISO 9001 standard's requirements. On May 15, 2003, Ohaus Corporation, USA, was re-registered to the ISO 9001:2000 standard.

Defender Series Base EN-1

#### INTRODUCTION

This manual covers installation, and maintenance instructions for the Ohaus Defender<sup>™</sup> Series Base. Please read this manual completely before installation and operation.

#### **SAFETY PRECAUTIONS**

For safe and dependable operation of this product, please comply with the following precautions:

- Operate the base only under ambient conditions specified in these instructions
- Ensure that the load cell cable does not pose an obstruction or tripping hazard
- Do not operate the base in hazardous environments or unstable locations
- Do not drop loads on the base
- Do not lift the base by the top frame; always lift from the bottom frame when moving the base
- Service should only be performed by authorized personnel

#### **INSTALLATION**

#### **Unpacking**

Unpack and inspect the product to make sure that all components have been included. The package includes the following:

Defender <sup>™</sup> Series Base
 Weighing Pan
 Warranty Card
 Instruction Manual

When purchased as a complete Defender Series Scale, will also include:

• 3000 Series Indicator • Column Assembly

#### **Assembly**

#### Weighing Pan

Place the weighing pan securely over the rubber load pads on the top frame of the base.

#### **Wiring Connections**

Connect the load cell cable to an indicator using the wiring codes in Table 1 below. Refer to the indicator manual for information about load cell connections, setup and calibration.

**Note**: When purchased as a Defender Series Scale, the base is already pre-wired to the 3000 Series Indicator.

TABLE 1. SIX WIRE LOAD CELL CONNECTION.

| FUNCTION     | WIRE COLOR |
|--------------|------------|
| + Excitation | Green      |
| - Excitation | Black      |
| + Signal     | Red        |
| - Signal     | White      |
| + Sense      | Blue       |
| - Sense      | Brown      |
| Shield       | Yellow     |

#### Selecting the Location

To ensure accuracy, proper performance and safety, locate and operate the base on a stable, level surface. Avoid locations with rapid temperature changes or excessive dust, air currents, vibrations, electromagnetic fields or heat.

Level the base by adjusting the four leveling feet until the bubble in the level indicator (located at the rear of the base) is centered. A wrench may be needed to loosen the locking nut above each leveling foot. When the base is level, retighten the locking nuts up against the base to lock each foot into place.

**Note**: Ensure that the base is level each time its location is changed.

CORRECT INCORRECT

EN-2 Defender Series Base

#### **MAINTENANCE**

#### Cleaning

The base components should be kept clean and free of excessive material build up.

• Damp cloth with water and a mild detergent may be used to wipe clean the external surfaces—do not use acids, alkalis, strong solvents or abrasive materials and chemicals

#### **Troubleshooting**

Aside from installing components and leveling adjustments, the Defender Series Base does not require any other adjustments as shipped from the factory.

Operational difficulties that may be encountered can often be traced to simple causes such as:

- Loose or incorrect wiring connections
- Obstructions to the base frame
- Unstable environments
- Incorrect calibration or setup of the indicator

If the troubleshooting section does not resolve or describe your problem, contact your authorized Ohaus service agent. For service assistance or technical support in the United States call toll-free 1-800-526-0659 between 8:00 AM and 5:00 PM EST. An Ohaus product service specialist will be available to provide assistance. Outside the USA, please visit our web site, www.ohaus.com to locate the Ohaus office nearest you.

#### **TECHNICAL DATA**

# **Technical Specifications**

The technical data is valid under the following ambient conditions:

Ambient temperature: -10°C to +40 °C

Relative humidity: 10% to 90% relative humidity, non-condensing

Height above sea level: Up to 4,000m

Operability is assured at ambient temperature -10°C to +40 °C

Defender Series Base EN-5

#### LIMITED WARRANTY

Ohaus products are warranted against defects in materials and workmanship from the date of delivery through the duration of the warranty period. During the warranty period Ohaus will repair, or, at its option, replace any component(s) that proves to be defective at no charge, provided that the product is returned, freight prepaid, to Ohaus. This warranty does not apply if the product has been damaged by accident or misuse, exposed to radioactive or corrosive materials, has foreign material penetrating to the inside of the product, or as a result of service or modification by other than Ohaus. In lieu of a properly returned warranty registration card, the warranty period shall begin on the date of shipment to the authorized dealer. No other express or implied warranty is given by Ohaus Corporation. Ohaus Corporation shall not be liable for any consequential damages.

As warranty legislation differs from state to state and country to country, please contact Ohaus or your local Ohaus dealer for further details.
